

Overview of ArguSoft

ArguSoft was started in the year 2000 and has established itself as one of the most dependable software services organization. In addition to software services, we also have developed different IPs that can be leveraged in client projects as appropriate.

In the areas of Enterprise Software Projects, we have completed several SOA projects in the domains of Healthcare, Education and Finance using Enterprise Java and web applications as the basic development platform, with open source as well commercial databases.

ArguSoft's leadership team sits in California, USA and with our development centre in Gandhinagar, in the state of Gujarat in India. This has kept us well poised to provide the best of services for our clients with the convenience of local presence combined with the cost savings that come from an offshore presence. Some of our Enterprise application development and integration projects have been executed successfully in an onsite / offshore model as well.

Technical Competence

Our unique recruitment process and proactive retention initiatives has helped us attract and retain some of the best technical minds that are available in this part of the world. Continuous education and training as well as 'discovery' incentives for the team combined with their inherent passion have impacted positively for our team to be on the cutting edge of technology at all times.

Our primary area of technical expertise is in Enterprise Java. In addition to Enterprise java, our expertise includes design and development of applications in PHP, dotNet and C/C++. We have also considerable experience in developing applications for mobile devices using Android, iOS and JME.

In addition to core development experience our team comprises of a team of Database Professionals, Graphics Professionals, Qualified Business Analysts as well as a dedicated team of Quality Assurance Engineers.

Domain Familiarity

Education, Healthcare and Financial services have been the top three domain areas. Basic domain expertise on the general processes and practices are abundant in the team by virtue of these projects. In addition to the in house domain exposure, ArguSoft also hires external qualified domain experts on an as needed basis.

More recently, our teams have had a high level of exposure in the development and customization of enterprise level applications for higher education institutions using Quali. Specifically, ArguSoft has worked with Quali Financial System, Quali coeus, Quali Mobility, and Quali Student modules.

Benefits of engagement

In addition to the obvious benefits of cost savings, an engagement with ArguSoft for development and maintenance of application software are numerous. ArguSoft can dedicate resources to act as an extended team from offshore without any of the HR related overheads for the clients. While the team itself shall be fully accessible, peripheral resources for program management, technical management, BA, UI/UX and QA are accessible offshore. Our Reputation as one of the premier IT project companies in Gujarat helps us attract the best talent quickly.
